CSE 4095 - Classroom Survey Web App: Submission

Deliverable	Where
A. GitHub repository	https://github.com/george3281/classroom-survey
B. Deployed application	https://classroom-survey.onrender.com/
B. Instructor test access	Login given privately in the HuskyCT submission comment (not stored in the repo)
C. Development summary	DEVELOPMENT_SUMMARY.md / `DEVELOPMENT_SUMMARY.pdf`
D. AI development history	AI_HISTORY.md / `AI_HISTORY.pdf`
E. Database evidence	screenshots/ (listed below)

Repository contents (required by A)

- Application source code: `src/`
- Provided specs: `Classroom_Survey_Web_App_Specification.md`, `DATABASE.md`, `API.md`, `UI.md`, `TODO.md`
- Updated `TODO.md` with completed tasks checked
- Database migration: `supabase/migrations/20261105000000_init.sql`
- `README.md` with setup and deployment instructions
- Automated tests: `tests/` (`npm test`)

Database evidence (E)

These screenshots come from Supabase Studio on a local Supabase stack (`npx supabase start`). It runs the same migration as the hosted project and holds real test submissions made through the app and its public API. No credentials or real student data appear.

File	Shows
`01-supabase-schema-relationships.png`	The 5 tables with primary keys and foreign-key relationships
`02-supabase-table-surveys.png`	Surveys stored with status and public slug
`03-supabase-table-questions.png`	Questions linked to their survey (`survey_id`)
`04-supabase-table-choices.png`	Choices linked to their question (`question_id`)
`05-supabase-table-responses.png`	12 stored student submissions with anonymous tokens and timestamps
`06-supabase-table-answers.png`	Answers linked to response, question, and choice
`07-app-dashboard.png`	Instructor dashboard
`08-app-results-recursion.png`	Results for an active survey: counts and percentages
`09-app-results-data-structures.png`	Historical results for an archived survey (7 responses)
`10-app-present-qr.png`	Presentation page with QR code, URL, and response count
`11-app-editor.png`	Survey editor
`12-student-survey-mobile.png`	Student view on a phone-sized screen, no login

File	Shows
`13-student-thank-you-mobile.png`	Confirmation after submitting

Checklist (assignment section 10)

- [x] The application runs locally
- [x] The instructor can create and activate surveys
- [x] Students can access surveys through QR codes (URL encoded in the QR code; verified in the browser)
- [x] Students can submit answers without logging in
- [x] Responses are saved in the database
- [x] The instructor can view results
- [x] The database tables and relationships are implemented
- [x] The application is deployed publicly
- [x] The GitHub repository contains the required files
- [x] Sensitive credentials are not committed
- [x] The development summary and AI interaction history are included
- [x] Database screenshots are included
